# Practice quiz onTangent Lines to Functions

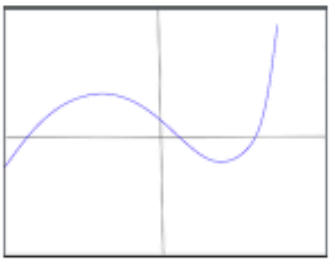
**PUNTOS TOTALES DE 2**

1. Suppose that $f : \mathbb{R} \to \mathbb{R}$ is a function. Which of the following expressions corresponds to $f'(2)$, the slope of the tangent line to the graph of $f(x)$ at $x = 2$? **1 / 1 puntos**

- (●) $f'(2) = \lim_{h \to 0} \frac{f(2+h)-f(2)}{h}$
- ( ) $f'(2) = 2$
- ( ) $f'(2) = \lim_{h \to 0} \frac{f(a+h)-f(a)}{h}$
- ( ) $f'(2) = mx + b$

✓ **Correcto**
This expression can be obtained from the first screen of our video by plugging in 2 for $a$.

2. Suppose that $h : \mathbb{R} \to \mathbb{R}$ is a function whose graph is shown as the blue curve in the figure. For how many values of $a$ is $h'(a) = 0$? **1 / 1 puntos**



- ( ) 3
- ( ) Never
- ( ) Always
- (●) 2

✓ **Correcto**
$h'(a)$ gives the slope of the tangent line to the graph of $h$ at the point $x = a$.

When $h'(a) = 0$, this means that the tangent line is horizontal.

There are two places (one on each side of the $y$-axis) where this tangent line is horizontal, so this answer is correct.
